

JJM Boiler Works, Inc.

MgO Refill Pellets

To Our:

Dealers, HVAC Wholesalers, Plumbing Wholesalers, Representatives and OEM Accounts.

Subject: JJM Pellet Refill Kits

JJM's inline tube series and tank series products should be recharge annually at a minimum for continued safety of drainage systems and to protect your environment. Refill products can be found on our website and in your price books.

Please note to your contractors and service technicians that if they need to refill another manufacture's product whether a tube or tank that JJM pellets can be installed in anybody's product.

They should follow the OEM refill directions using JJM's Pellets; they will find better performance and a longer lasting product especially when replacing 100% limestone or marble chips. JJM pellets are to be used in pH treatment products for the hydronic, hot water, furnace, and flue stack industry only.
